Education

Indian Institute of Technology Madras — Chennai, India
B.Tech in Civil Engineering | CGPA: 7.71/10 — *2023 – 2027*
Class XII, Board of Intermediate Education, Andhra Pradesh | 96.7% — 2023
Class X, Board of Secondary Education, Andhra Pradesh | 99% — 2021

Experience

Groop Games — May 2026 – Jul 2026
AI Engineering Intern

- Built a board-game AI in JavaScript using Minimax with alpha-beta pruning, transposition tables and move ordering
- Achieved **106.3x** median speedup and **98.3%** node reduction over naive search across 200 depth-4 benchmark positions
- Redesigned board state with BigInt bitmasks, enabling **9.4x** faster board copies and **5.3x** faster state-key generation
- Implemented iterative deepening with time-controlled search to return strong moves under varying compute budgets
- Validated **1,000** positions, **2,197** penalty cases and **120** JS/Python cross-checks, confirming exact search correctness

Projects

Autonomous GitHub Issue Agent — *Python, FastAPI, LangGraph, PyGithub, Docker*

- Developed an 8-stage LangGraph pipeline that fetches issues, localizes bugs, writes fixes and tests, and opens PRs
- Served concurrent users through a multi-tenant FastAPI backend with per-session state, deployed on Render via Docker
- Automated branch creation, commits and pull requests with PyGithub, gated behind an explicit human-approval step
- Resolved **80%** of issues with **100%** top-1 bug localization; its self-repair loop recovered **40%** of failed first patches

Secure Clinic Scheduling Platform — *Python, FastAPI, SQLAlchemy, SQLite, WebSockets, APScheduler, JWT*

- Delivered a clinic booking platform with smart reminders and live waitlists at **99.9%** uptime and **3x** faster bookings
- Scaled to **5,000+** users, reducing no-shows by **35%** and increasing patient retention by **22%** through timely reminders
- Enforced role-based access control and audit trails for **100%** traceability across bookings, queues and clinic operations

Blockchain Credential Platform, CFI WebOps & Blockchain — *Solidity, Hardhat, OpenZeppelin, React, IPFS*

- Wrote soulbound ERC-721 credential contracts with OpenZeppelin and a React/IPFS frontend for verifiable issuance
- Cut credential issuance gas by **8.4%** through batch minting, capping each batch at **50** certificates for safe execution
- Verified **1,000** issued credentials end to end with **100%** success and a **2.27 ms** p95 verification latency in stress tests

Financial Document Intelligence RAG — *Python, ChromaDB, BM25, Streamlit*

- Architected hybrid retrieval fusing dense embeddings and BM25 with CrossEncoder reranking, hitting **83.3%** Recall@5
- Shipped citation-grounded answers with prompt-injection defenses, scoring **88.7%** faithfulness and **95.12%** relevancy
- Ingested PDF, DOCX and XLSX files into ChromaDB with table-preserving extraction behind a Streamlit chat UI

Positions of Responsibility

CEA WebOps, IIT Madras — Dec 2023 – Jun 2024

- Revamped responsive, accessible web interfaces in HTML, CSS and JavaScript and maintained the association website

Technical Skills

Languages & Databases: C++, C, Python, JavaScript, SQL, Solidity, HTML, CSS, PostgreSQL, MySQL, ChromaDB
Frameworks & Libraries: React, FastAPI, Streamlit, LangGraph, LangChain, PyTorch, Scikit-learn, NumPy, Pandas
Tools & Platforms: Git, GitHub, Docker, Render, Hardhat, Foundry, IPFS, Figma, PyGithub, OpenZeppelin, Ethers.js
Concepts: Data Structures & Algorithms, DBMS, REST APIs, Game-Tree Search, Smart Contracts, Web3, AI Agents

Achievements

- JEE Advanced 2023: category rank **951** among **2.5 lakh** candidates (top **2.9%**); JEE Main: top **0.59%** of **11 lakh**
- ISI Admission Test: top **1–2%**, shortlisted for B.Stat (Hons.) interview; AP EAPCET: rank **606** among **2.38 lakh**
- Google PromptWars: rank **312** with a **93.13** score; invited to Ather Builders 2026 with sponsored entry and travel
